

Data & Voice Cabling Solutions

TCS offers data and voice cabling solutions for your business regardless of the size and budget. Our cabling services include phone and voice cabling, data cabling, fibre optic cabling, patch panel installation, wireless networking, server room cabling and rack installation.

Whether you're moving to a new office location, upgrading or expanding your existing infrastructure or simply need repair/clean up of the current infrastructure, TCS will help you achieve your objectives in terms of quality, cost and timelines.

**Reliable and
affordable
IT network
infrastructures.**

Professional cabling and fiber optic installation services.

TCS offers competitive rates on fiber optic, Cat5/5e, Cat6/6a and Cat7 cabling solutions installed by highly trained, experienced and professional cabling technicians.

From design to implementation to maintenance services, our team will ensure all your business needs are met.

AFFORDABLE SOLUTIONS

We offer cost effective data and voice cabling solutions without compromising on quality.

We will tailor the solution to meet your company's budget.

SUPERIOR QUALITY

TCS only uses premium materials, ensuring we deliver first-rate quality for our customers.

All the materials we use are Belden, a world-leading manufacturer in cabling solutions.

FLEXIBLE & SCALABLE

Whether your company has 1 workstation or over 500, TCS will scale the solution to meet your business requirements. Expanding to allow for more users is simple.
